

ShipRush

Server

Ship with just a click of a button! To one customer or hundreds, ShipRush Server works with popular CRM systems out of the box. All tracking numbers are automatically saved in your CRM system.

Features and Benefits:

- Process shipments fast
- Automatically save tracking numbers into CRM applications
- Increase your company's efficiency and save money while you do it
- No rekeying of data – ShipRush pulls the address from your CRM application automatically
- Tracking numbers and freight charges are saved on CRM history records
- Print enclosure codes (like an order number) on the shipping label
- Email notifications built in – recipients are automatically alerted with the tracking numbers
- ShipRush prints to thermal, laser, and inkjet labels to any standard printer on your network

 A screenshot of the 'OmniRush Universal Client' software interface. The window title is 'OmniRush Universal Client' and it has a menu bar with 'Server', 'Job', 'Contact', 'Favorites', 'Tools', and 'Help'. Below the menu bar are several icons for different functions. The main area contains a form for creating a shipment. The 'Track' dropdown is set to 'ShipRush' with a 'Shipment' button next to it. The 'Recipient' field contains 'Mike Johnson'. The 'Company' field contains 'Wool Roofing'. The 'Phone' field contains '(800)321-1234'. The 'Send on' field shows a date of '10/28/2004' and a time of '8:08:42 AM'. The 'Reference' field contains 'Order # 5219854'. The 'Address' field contains '111 Main st'. The 'City' field contains 'Santa Rosa', 'State' contains 'CA', and 'ZIP' contains '95404'. The 'Weight_LBS' field contains '5'. The 'Insured value, US\$' field is empty. The 'Shipping template' field is empty. The 'Notes' field contains 'Thank you for your order!'. At the bottom of the window are buttons for 'Help', 'Process Shipment', and 'Cancel'.

Out-of-box integration with:

ACT! 2005

GoldMine, including Automated Processes and iGoldMine

Microsoft CRM, including MSCRM workflow

SalesLogix, including the SalesLogix Web Client and Processes

Database Systems: Developers can integrate ShipRush Server to nearly any system running on Microsoft SQL Server, Oracle, Pervasive, MySQL, and other ADO accessible databases

ShipRush Server is for domestic, single-piece shipments on DHL, FedEx and UPS.

ShipRush

Server

Who uses ShipRush?

- ⌘ Subscription businesses (like fruit-of-the-month clubs) process shipping labels to their subscriber list right from the CRM system.
- ⌘ Sales teams ship samples via a single button click in the CRM system.
- ⌘ Mortgage and insurance firms overnight documentation, and anyone can track it if the customer calls in.
- ⌘ Customized CRM systems put shipping into the workflow, right where it is needed.
- ⌘ Web developers use ShipRush Server to put shipping into browser-based applications, either in real time or batch mode.

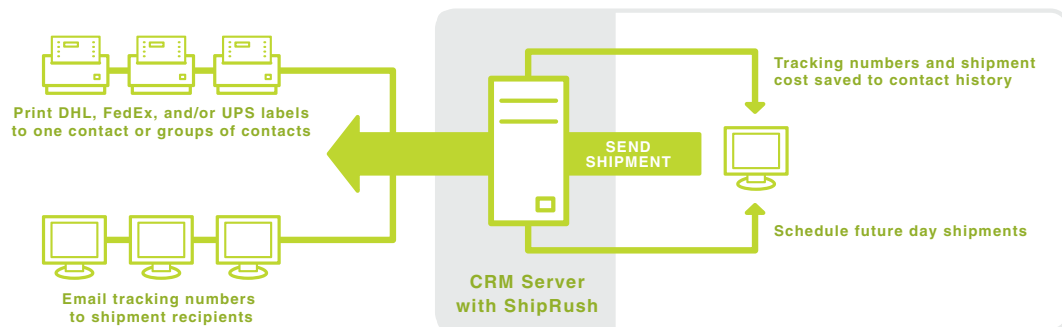

Technical Information

ShipRush Server runs on the following Microsoft Operating Systems:

- ⌘ Windows 2000
- ⌘ Windows XP
- ⌘ Windows 2003 Server

ShipRush supports:

- ⌘ Laser printers
- ⌘ Thermal label printers (e.g. Eltron)

The OmniRush Family

ShipRush Server is a member of the OmniRush Family. The OmniRush Family includes CashRush, EmailRush, FaxRush, PrintRush, and ShipRush Server. The OmniRush Family of products is a suite of utilities every business can use. From communication to back office functions like shipping and credit card processing, this suite offers the features you need and completely integrates with the system you use. Please visit www.zfirm.com to learn more about the OmniRush Family of products.
